Schematic of Typical  
Two - 1 DECK Vibroscreen Circular Separator

**FINEX VIBRATROSCREEN** Are vibrating machines which impart adjustable, multiplane, mechanical, vibrations to Powders and liquids being processed. The basic assembly consists of a number of interchangeable frames for retention of screen from 4 to 400 mesh with discharge outlets for different powder sizes.

A high torque, low power gyratory motor with a double extension shaft, fitted at each end with variable eccentric weights, is rigidly mounted on the main screening assembly Base.

This assembly is supported on the circular base by rugged springs which allow the screen assembly to vibrate freely while completely preventing vibration transmission to the floor on which the machine is resting : From Single up to nine Separation available
